KAVELLO
TRADING PLATFORM

PLATFORM BROCHURE · 2026 EDITION

Trading, structured for growth.

Kavello runs managed trading strategies across crypto and forex markets and shares the results through simple daily-yield plans. This brochure covers the platform end to end — how it works, what the plans pay, and how members get paid.

KAVELLO.COM

ABOUT KAVELLO

A managed desk, opened to everyone

Kavello was built by a small team of traders and engineers who wanted one thing: professional-grade trading strategies, packaged into plans anyone can join with a few clicks. Members deposit into a plan, our systems trade the pooled capital, and profits are credited daily — visible in the member area at any moment.

Automated strategies

Tested algorithmic strategies run around the clock across major pairs and assets, with risk limits set per strategy.

Real-time reporting

Balances, daily earnings and payout history update live in your member area — nothing is hidden, nothing waits for month-end.

Fast settlements

Earnings can be withdrawn daily. Requests are processed in batches through the day, most within a few hours.

INSIDE THE MEMBER AREA

Account balance		**$2,480.50**
Active plan — Growth		Day 18 of 30
Earnings today		**+$69.44**
Referral earnings (all time)		**$312.90**

Illustrative member-area view. Figures shown are an example layout, not a specific member's account.

HOW IT WORKS

From signup to daily earnings in four steps

STEP 01

Create your account

Register free with an email address and a password. Enable two-factor authentication in settings for extra protection.

STEP 02

Deposit into a plan

Choose a plan and fund it with any accepted payment method. The plan activates the moment your payment confirms.

STEP 03

Earnings accrue daily

Your plan's daily rate is credited to your balance every 24 hours. Watch it grow in real time from the member area.

STEP 04

Withdraw or compound

Withdraw earnings any day from $10, or reinvest them into the same or a higher plan to compound your results.

What a Growth plan looks like over its term

Balance growth on a $1,000 Growth plan deposit at 2.8% daily, earnings left to accumulate across the 30-day term.

At the end of the term the deposit principal is returned to the balance together with the final day's earnings, ready to withdraw or roll into a new plan.

INVESTMENT PLANS

Daily yield, clearly stated

Every plan credits its rate daily and returns the principal at the end of the term. Choose by budget and time frame.

STARTER

2.2% / day

- 20-day term
- Daily payouts to balance
- Principal returned at term end

Deposit range

$50 – $999

GROWTH · MOST JOINED

2.8% / day

- 30-day term
- Daily payouts to balance
- Principal returned at term end
- Priority support queue

Deposit range

$1,000 – $14,999

PRO DESK

3.6% / day

- 40-day term
- Daily payouts to balance
- Principal returned at term end
- Dedicated account manager

Deposit range

$15,000 – $250,000

Multiple plans can run at the same time. Earnings from each plan are tracked separately in the member area, and every plan can be renewed in one click when its term ends.

WORKED EXAMPLES

The numbers, worked out

Daily rates are simple once you see them applied. Four typical deposits, followed through to the end of their terms:

PLAN	DEPOSIT	DAILY CREDIT	TERM EARNINGS	TOTAL RECEIVED*
Starter · 2.2% · 20 days	$500	$11.00	$220	**$720**
Growth · 2.8% · 30 days	$1,000	$28.00	$840	**$1,840**
Growth · 2.8% · 30 days	$5,000	$140.00	$4,200	**$9,200**
Pro Desk · 3.6% · 40 days	$20,000	$720.00	$28,800	**$48,800**

*Total received = term earnings plus the deposit principal, which returns to your balance automatically when the term ends.

Compounding: two Growth terms on $1,000

APPROACH	TERM 1	TERM 2	EARNINGS TOTAL
Withdraw the earnings each term	$840 on $1,000	$840 on $1,000	$1,680
Reinvest everything into term 2	$840 on $1,000	$1,545.60 on $1,840	**$2,385.60**

Reinvesting puts the first term's earnings to work as well — the second term runs on $1,840 instead of $1,000. Members can reinvest in one click when a term ends, or withdraw any part and reinvest the rest.

Examples use the plan rates published on the plans page. A running plan always keeps the rate it started with, even if rates for new deposits change later.

Where the trading capital works

Pooled deposits are allocated across the desk's strategy families. Allocation is reviewed weekly and rebalanced as market conditions change.

- **40% — Spot & swing trading**
  Major crypto pairs, multi-day positions
- **26% — Forex majors**
  EUR/USD, GBP/USD and index CFDs
- **17% — Grid & arbitrage**
  Cross-exchange spreads, market-neutral
- **17% — Reserve & staking**
  Liquidity buffer and on-chain yield

Desk performance — recent quarters

QUARTER	TRADING DAYS	DESK RETURN	BEST MONTH
Q1 2026	64	+38.4%	+14.1%
Q2 2026	63	+41.9%	+15.8%
Q3 2026	65	+44.2%	+16.3%

Desk returns are the trading team's gross results before member plan rates are credited. Past desk performance does not guarantee future results; plan rates are fixed at deposit and do not change mid-term.

PAYMENTS

Deposit and withdraw in crypto

All balances are held in USD. Deposits convert at the live rate on arrival; withdrawals are sent to your wallet in the method you choose.

- Bitcoin (BTC)
- Litecoin (LTC)
- Ethereum (ETH)
- Dogecoin (DOGE)
- Tron (TRX)
- BNB
- Tether USDT (TRC20)
- Tether USDT (ERC20)
- Tether USDT (BEP20)

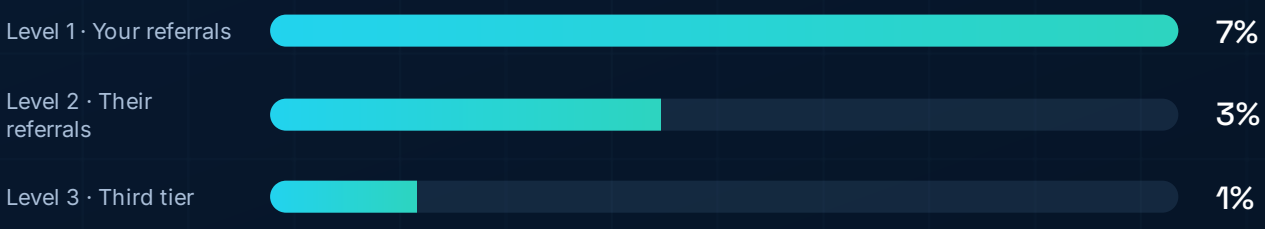

Minimum deposit $50 · Minimum withdrawal $10 · No deposit fees charged by Kavello (network fees apply on chain).

REFERRAL PROGRAM

Three levels, paid instantly

Your referral link pays commission on every deposit your network makes — credited the moment the deposit confirms.

No own deposit is required to earn referral commission, and commission balances can be withdrawn from $10 like any other earnings.

MEMBER WORDS

In their words, not ours

"The daily credit is the habit I didn't expect. Coffee, open the app, the number has moved. Thirty days of that and the term just quietly finishes — principal back, earnings in the balance."

MARCUS T. · GROWTH PLAN · MEMBER SINCE 2025

"I run a small Pro Desk position alongside my own trading. The desk's reporting is better than most funds I've used — every credit itemised, nothing lumped together."

ELENA R. · PRO DESK · MEMBER SINCE 2024

"Support answered at 2 a.m. during my first withdrawal and walked me through the address whitelist. That is when I moved my second deposit in."

DAVID O. · STARTER, THEN GROWTH · MEMBER SINCE 2025

SECURITY

Built to be boring — in a good way

Cold storage first

The majority of platform funds sit in offline cold wallets. Hot wallets hold only what daily settlements require.

Account protection

Two-factor authentication, login alerts and withdrawal address whitelists guard every member account.

Always-on infrastructure

DDoS-protected servers with full encrypted backups keep the platform reachable and your records safe.

Transparent ledger

Every credit, payout and commission is written to your account history the moment it happens — exportable any time.

FAQ

When do earnings start?

The first daily credit lands 24 hours after your plan activates, and then every 24 hours until the term ends.

Can I withdraw before the term ends?

Earnings can be withdrawn daily. The deposit principal stays in the plan until the term completes, then returns to your balance automatically.

Do plan rates ever change?

Rates can change for new deposits, but a running plan always keeps the rate it started with.
