ABOUT NORTHPINE

A straightforward way to put money to work

Northpine Capital pools member deposits into a managed portfolio of short-term trading and lending positions. The returns generated by that activity fund the fixed returns published in our plans, so the rate you see when you deposit is the rate you are paid at the end of the term.

The platform is fully online. Your member area shows your active deposits, accrued returns and payout history in real time, and our support team answers questions every day of the week.

HOW IT WORKS

1. **Create your free account**
   Register with your name and email address. Your member area is ready in under a minute.

2. **Choose an investment plan**
   Pick the plan that fits your budget and time frame. Every plan shows its return, term and deposit range before you commit.

3. **Fund your deposit**
   Send your deposit with any accepted payment method. It is credited to your account as soon as the payment confirms.

4. **Receive your payout**
   When the term ends, your return plus your principal is paid to your account balance, ready to withdraw or reinvest.

DURING YOUR TERM

Your deposit confirms and the plan clock starts. Accrued returns are shown in your member area every day, so you can watch the term progress. On the final day the full payout — return plus principal — lands in your account balance, ready to withdraw or place into a new plan.

SECURITY & SUPPORT

Your money and account, protected

Funds held in cold storage

The majority of platform funds are kept in offline wallets, away from the internet. Only the amounts needed for daily payouts stay online.

Two-factor account protection

Every account can be locked with two-factor authentication, login alerts and a PIN for withdrawal changes.

Protected, backed-up platform

The site runs on DDoS-protected servers with encrypted daily backups, so your account records are never lost.

Every payout double-checked

Withdrawal requests pass an automatic check and a manual review before they are sent — wrong addresses are caught before money moves.
